## EDUCATION

---

### **Johns Hopkins University**

*Master of Science in Engineering in Computer Science*

GPA: 3.75; Awards and Honors: Rubenstein Fellowship

Master Thesis: GAITA: a RAG System for Personalized Computer Science Education (advised by Dr David Yarowsky)

### **University of California, Berkeley**

*Professional Certificate in Machine Learning and Artificial Intelligence*

*Bachelor of Arts in Linguistics, Minor in English*

GPA: 3.90; Honors and Societies: Phi Beta Kappa, Distinction in General Scholarship

### **West Valley College**

*Associate of Science in Administration of Justice*

GPA: 3.89; began coursework at age 15 following a homeschool education

## PROFESSIONAL EXPERIENCE

---

### **University of Chicago**

*Sep 2025 – Present*

*AI Librarian, Center for Digital Scholarship*

Internal-Facing:

- PM for the library's strategic priority #11 (Enabling the Library and University to benefit from artificial intelligence by leading the cross-campus program on generative AI and integrating AI into services responsibly.) Manage annual budget, define goals, and write the project charter for each fiscal year.
- Contribute to discussions on AI strategy, values, risk, and adoption with library leadership
- Meet with visitors and prospective supporters to discuss the library's AI strategy and services
- Create an AI evaluation framework for vendor tools and internal projects to support consistent, responsible, and transparent decision-making around AI
- Developing internal AI education resources (self-paced course, resource guides, monthly newsletter)

External-Facing:

- Lead and plan AI initiatives and events in the library.
- Teach workshops on introductory AI, ethics/responsible use, and research applications for students and faculty.
- Provide consultations to students and faculty incorporating AI into research and learning.
- Co-founded a cross-institutional community of practice of AI practitioners from academic libraries to create openly licensed resources, reducing duplicated effort across campuses and increase collective impact.

### **Novita AI**

*June 2025 – Sep 2025*

*Founding Developer Relations Engineer*

- Established workflows for email campaigns, automations, and CRM use to drive top-of-funnel growth
- Built developer relations and content strategy, including user onboarding flow, product education, and user-facing resources for AI infrastructure products (nurture leads)
- Created documentation, blog posts, and marketing/educational materials that helped developers understand and integrate Novita's tools into their workflows
- Represent Novita through event presence (presenting hackathon awards, tabling at AI events)

- Lead development of a RAG chatbot enabling interactive engagement with AIM-AHEAD's Data Science course-work
- Write technical design documentation to outline rationale and implementation details for stakeholders
- Present project updates and outcomes to stakeholders

**Apple**

*Aug 2023 – Sep 2024*

*AI Education Teaching Assistant (AIML org)*

- Collaborated with Industry Experts Educators to develop and produce a series of internal NLP and ML courses
- Designed and implemented hands-on coding exercises using Jupyter notebooks to provide practical experience
- Established and adhered to style guides to maintain consistency in course materials
- Delivered a research talk on Retrieval-Augmented Generation (RAG) and its educational applications

**International Rescue Committee**

*June 2024 – Aug 2024*

*Data Analytics and Systems Intern*

- Designed and implemented a SharePoint-based Knowledge Management System with an integrated RAG chatbot to streamline information access and enhance operational efficiency
- Conducted user research to identify user needs, optimizing data retrieval workflows for refugee aid programs

**SELECTED PROJECTS**

---

**GAITA: Personalized Pathways for Learning Computer Science**

*Apr 2024 – Dec 2024*

- Developed and deployed GAITA, a GPT-4o-mini RAG chatbot that creates personalized CS learning pathways tailored to users' background and goals
- Built a web crawler & scraper to compile a vector-enhanced database of 1,200+ open-access CS courses
- Created prompt templates and system architecture for reliability and accuracy
- Implemented a semantic retrieval pipeline for course recommendations
- Built learning pathways through iterative prompting
- Selected for the Backdrop Build pre-accelerator
- Presented at a Research Talk at Apple

**Mitigating Social Bias in Language Models Through Adversarial Debate**

*Apr – May 2024*

- Designed and implemented an experimental framework using GPT-3.5 turbo to explore and measure biases by promoting debates on stereotypes
- Analyzed the effectiveness of debate interventions on pre- and post- debate model outputs
- Implemented a standardized question framework to measure shifts in model viewpoints and assess bias reduction
- Developed metrics and reports to gain insights into bias mitigation

**Suicide Ideation Detection**

*Jul – Sep 2022*

- Preprocessed over 20,000 Reddit posts using NLP techniques to prepare data for classification
- Trained text classification models achieving 92% accuracy and 96% recall in detecting suicide ideation
- Utilised ELI5 and LIME for global and local model interpretability, validated feature importances using KL-Divergence scores, and developed a vocabulary of predictive terms
- Received recognition from professors and was selected as an exemplar project for future cohorts

## TALKS AND WORKSHOPS

---

**AI in Academic Work: Capabilities, Limitations, and Responsible Use** | Invited Speaker, University of Chicago Law School, May 11, 2026

**Working with AI at UChicago** | Invited Speaker, UChicago Exploratory Teaching Group (ETG), May 4, 2026

**AI in Academic Librarianship: What This Work Looks Like in Practice** | Guest Lecture, University of South Carolina, Apr 16, 2026

**What AI Can and Cannot Do** | Workshop, Grad @ UChicago, Feb 17, 2026

**Pulling the Wool Over AI** | Guest Lecture, UChicago's HUMA 10001 Undergraduate Research: What, Why, and How, Feb 10, 2026

**Using AI in Research and Writing** | Workshop, UChicago Center for Digital Scholarship, Feb 5, 2026

**Town Hall: Directions for AI** | University of Chicago Library, Feb 4, 2026

**Pulling the Wool Over AI** | Workshop, UChicago Center for Digital Scholarship, Nov 18, 2025

**Responsible AI Use in Humanities Research** | Guest Lecture, UChicago's GNSE Thesis Seminar, Oct 24, 2025

**GAITA: A Rag System for Personalized Computer Science Education** | Research Talk, Apple, Sep 18, 2024

## AWARDS AND HONORS

---

Rubenstein Fellowship – Johns Hopkins University, 2023

2nd Place – Intel® AI for Social Good Hackathon, NLP Track, 2022

Distinction in General Scholarship – UC Berkeley, 2021

Phi Beta Kappa – UC Berkeley, 2021

Berkeley Transfer Scholarship – UC Berkeley, 2020

Distinction – Associate of Trinity College London (ATCL) in Violin Performance Diploma, 2018
