EDUCATION

Johns Hopkins University

Master of Science in Engineering in Computer Science

GPA: 3.75; Awards and Honors: Rubenstein Fellowship

Master Thesis: GAITA: a RAG System for Personalized Computer Science Education (advised by Dr David Yarowsky)

University of California, Berkeley

Professional Certificate in Machine Learning and Artificial Intelligence

Bachelor of Arts in Linguistics, Minor in English

GPA: 3.90; Honors and Societies: Phi Beta Kappa, Distinction in General Scholarship

PROFESSIONAL EXPERIENCE

University of Chicago

Sep 2025 – Present

AI Librarian, Center for Digital Scholarship

Internal-Facing:

- PM for the library's strategic priority #11 (Enabling the Library and University to benefit from artificial intelligence by leading the cross-campus program on generative AI and integrating AI into services responsibly.) Manage annual budget, define goals, and write the project charter for each fiscal year.
- Contribute to strategic discussions on AI strategy, governance, and adoption with library leadership
- Meet with visitors and prospective supporters to discuss the library's AI strategy and services
- Create an AI evaluation framework for vendor tools and internal projects to support consistent, responsible, and transparent decision-making around AI adoption. In conversations on library strategy, values, and risk.
- Developing internal AI education resources (self-paced course, resource guides, monthly newsletter)

External-Facing:

- Lead and plan AI initiatives and events in the library.
- Teach workshops on introductory AI, ethics/responsible use, and research applications for students and faculty.
- Provide consultations to students and faculty incorporating AI into research and learning.
- Co-founded a cross-institutional community of practice of AI practitioners from academic libraries to create openly licensed resources, reducing duplicated effort across campuses and increase collective impact.

Novita AI

June 2025 – Sep 2025

Founding Developer Relations Engineer

- Established scalable systems for email campaigns, automations, and CRM use to drive top-of-funnel growth
- Built developer relations and content strategy, including user onboarding flow, product education, and user-facing resources for AI infrastructure products (nurture leads)
- Created documentation, blog posts, and marketing/educational materials that helped developers understand and integrate Novita's tools into their workflows
- Represent Novita through event presence (presenting hackathon awards, tabling at AI events)

AIML.com

Jan 2025 – May 2025

Machine Learning Content Writer

- Write SEO-optimized articles and interactive case studies to explain complex ML and AI concepts for technical and non-technical audiences (published on AIML.com)
- Collaborate with editors to refine content, ensuring clarity, technical accuracy, and accessibility

- Lead development of a RAG chatbot enabling interactive engagement with AIM-AHEAD's Data Science course-work
- Write technical design documentation to outline rationale and implementation details for stakeholders
- Present project updates and outcomes to stakeholders

Apple

Aug 2023 – Sep 2024

AI Education Teaching Assistant (AIML org)

- Collaborated with Industry Experts Educators to develop and produce a series of internal NLP and ML courses
- Designed and implemented hands-on coding exercises using Jupyter notebooks to provide practical experience
- Established and adhered to style guides to maintain consistency in course materials
- Delivered a research talk on Retrieval-Augmented Generation (RAG) and its educational applications

International Rescue Committee

June 2024 – Aug 2024

Data Analytics and Systems Intern

- Designed and implemented a SharePoint-based Knowledge Management System with an integrated RAG chatbot to streamline information access and enhance operational efficiency
- Conducted user research to identify user needs, optimizing data retrieval workflows for refugee aid programs

SELECTED PROJECTS

GAITA: Personalized Pathways for Learning Computer Science

Apr 2024 – Dec 2024

- Developed and deployed GAITA, a GPT-4o-mini RAG chatbot that creates personalized CS learning pathways tailored to users' background and goals
- Built a web crawler & scraper to compile a vector-enhanced database of 1,200+ open-access CS courses
- Created prompt templates and system architecture for reliability and accuracy
- Implemented a semantic retrieval pipeline for course recommendations
- Built learning pathways through iterative prompting
- Selected for the Backdrop Build pre-accelerator and presented at a Research Talk at Apple

Mitigating Social Bias in Language Models Through Adversarial Debate

Apr – May 2024

- Designed and implemented an experimental framework using GPT-3.5 turbo to explore and measure biases by promoting debates on stereotypes
- Analyzed the effectiveness of debate interventions on pre- and post- debate model outputs
- Implemented a standardized question framework to measure shifts in model viewpoints and assess bias reduction
- Developed metrics and reports to gain insights into bias mitigation

Suicide Ideation Detection

Jul – Sep 2022

- Preprocessed over 20,000 Reddit posts using NLP techniques to prepare data for classification
- Trained text classification models achieving 92% accuracy and 96% recall in detecting suicide ideation
- Utilised ELI5 and LIME for global and local model interpretability, validated feature importances using KL-Divergence scores, and developed a vocabulary of predictive terms
- Received recognition from professors and was selected as an exemplar project for future cohorts

TALKS AND WORKSHOPS

AI in Academic Work: Capabilities, Limitations, and Responsible Use | Invited Speaker, University of Chicago Law School, May 11, 2026

Working with AI at UChicago | Invited Speaker, UChicago Exploratory Teaching Group (ETG), May 4, 2026

AI in Academic Librarianship: What This Work Looks Like in Practice | Guest Lecture, University of South Carolina, Apr 16, 2026

What AI Can and Cannot Do | Workshop, Grad @ UChicago, Feb 17, 2026

Pulling the Wool Over AI | Guest Lecture, UChicago's HUMA 10001 Undergraduate Research: What, Why, and How, Feb 10, 2026

Using AI in Research and Writing | Workshop, UChicago Center for Digital Scholarship, Feb 5, 2026

Town Hall: Directions for AI | University of Chicago Library, Feb 4, 2026

Pulling the Wool Over AI | Workshop, UChicago Center for Digital Scholarship, Nov 18, 2025

Responsible AI Use in Humanities Research | Guest Lecture, UChicago's GNSE Thesis Seminar, Oct 24, 2025

GAITA: A Rag System for Personalized Computer Science Education | Research Talk, Apple, Sep 18, 2024

AWARDS AND HONORS

Rubenstein Fellowship – Johns Hopkins University, 2023

2nd Place – Intel® AI for Social Good Hackathon, NLP Track, 2022

Distinction in General Scholarship – UC Berkeley, 2021

Phi Beta Kappa – UC Berkeley, 2021

Berkeley Transfer Scholarship – UC Berkeley, 2020

Distinction – Associate of Trinity College London (ATCL) in Violin Performance Diploma, 2018
