

LOIS S. WONG

lois-wong.github.io/ | linkedin.com/in/lois-wong | lois@berkeley.edu

EDUCATION

Johns Hopkins University

Dec 2024

Master of Science in Engineering in Computer Science

GPA: 3.75; Awards and Honors: Rubenstein Fellowship

Master Thesis: GAITA: a RAG System for Personalized Computer Science Education (advised by Dr David Yarowsky)

University of California, Berkeley

Professional Certificate in Machine Learning and Artificial Intelligence

Mar – Sep 2022

Bachelor of Arts in Linguistics, Minor in English

Dec 2021

GPA: 3.90; Honors and Societies: Phi Beta Kappa, Distinction in General Scholarship

West Valley College

Jun 2019

Associate of Science in Administration of Justice

GPA: 3.89; began coursework at age 15 following a homeschool education

PROFESSIONAL EXPERIENCE

University of Chicago

Sep 2025 – Present

AI Librarian, Center for Digital Scholarship

TL;DR: Building the infrastructure and programming that shape how the library and university community evaluates and adopts AI. Strategically integrating novel and often controversial technologies into established norms and incentive structures. Designing frameworks, programs, and practices in an area with little/no established models or precedents, along with the institutional capacity and stakeholder enthusiasm to sustain them.

Internal-Facing:

- PM for the library's strategic priority 11 (Enabling the Library and University to benefit from AI by leading the cross-campus program on AI and integrating AI into services responsibly) – supporting implementation of the library's AI strategy, managing budget, annual project charter development.
- Designing an AI evaluation framework for vendor tools and internal projects that operationalizes institutional values, enables transparent/accountable decision making, and builds trust; grounding decision-making in a technical and institutional assessment of capability, limitation, and risk.
- Advise library leadership on AI strategy, governance, and organizational adoption.
- Build internal capacity/readiness for AI through internal education, open/office hours, etc.
- Meet with visitors and prospective supporters/partners to discuss the library's AI strategy and services.

External-Facing:

- Lead and plan AI initiatives and events in the library.
- Teach workshops and guest lectures on introductory AI, ethics, responsible use, and research applications, notably reaching those who may not otherwise engage with AI/CS coursework.
- Consult with students and faculty incorporating AI into research and learning.
- Co-founded a cross-institutional community of practice connecting AI practitioners in academia, creating openly-licensed resources, and reducing duplicated effort across organizations.

Novita AI

June 2025 – Sep 2025

Founding Developer Relations Engineer

- Established workflows for email campaigns, automations, and CRM use to drive top-of-funnel growth
- Built developer relations and content strategy, including user onboarding flow, product education, and user-facing resources for AI infrastructure products (nurture leads)

- Created documentation, blog posts, and marketing/educational materials that helped developers understand and integrate Novita's tools into their workflows
- Represent Novita through event presence (presenting hackathon awards, tabling at AI events)

Johns Hopkins Center for Digital Health and AI

Jan 2025 – Mar 2025

Technical Lead

- Lead development of a RAG chatbot enabling interactive engagement with AIM-AHEAD's Data Science coursework
- Write technical design documentation to outline rationale and implementation details for stakeholders
- Present project updates and outcomes to stakeholders

Apple

Aug 2023 – Sep 2024

AI Education Teaching Assistant (AIML org)

- Collaborated with Industry Experts Educators to develop and produce a series of internal NLP and ML courses
- Designed and implemented hands-on coding exercises using Jupyter notebooks to provide practical experience
- Established and adhered to style guides to maintain consistency in course materials
- Delivered a research talk on Retrieval-Augmented Generation (RAG) and its educational applications

International Rescue Committee

June 2024 – Aug 2024

Data Analytics and Systems Intern

- Designed and implemented a SharePoint-based Knowledge Management System with an integrated RAG chatbot to streamline information access and enhance operational efficiency
- Conducted user research to identify user needs, optimizing data retrieval workflows for refugee aid programs

SELECTED PROJECTS

GAITA: Personalized Pathways for Learning Computer Science

Apr 2024 – Dec 2024

- Developed and deployed GAITA, a GPT-4o-mini RAG chatbot that creates personalized CS learning pathways tailored to users' background and goals
- Built a web crawler & scraper to compile a vector-enhanced database of 1,200+ open-access CS courses
- Created prompt templates and system architecture for reliability and accuracy
- Implemented a semantic retrieval pipeline for course recommendations
- Built learning pathways through iterative prompting
- Selected for the Backdrop Build pre-accelerator
- Presented at a Research Talk at Apple

Mitigating Social Bias in Language Models Through Adversarial Debate

Apr – May 2024

- Designed and implemented an experimental framework using GPT-3.5 turbo to explore and measure biases by promoting debates on stereotypes
- Analyzed the effectiveness of debate interventions on pre- and post- debate model outputs
- Implemented a standardized question framework to measure shifts in model viewpoints and assess bias reduction
- Developed metrics and reports to gain insights into bias mitigation

Suicide Ideation Detection

Jul – Sep 2022

- Preprocessed over 20,000 Reddit posts using NLP techniques to prepare data for classification
- Trained text classification models achieving 92% accuracy and 96% recall in detecting suicide ideation

- Utilised ELI5 and LIME for global and local model interpretability, validated feature importances using KL-Divergence scores, and developed a vocabulary of predictive terms
- Received recognition from professors and was selected as an exemplar project for future cohorts

TALKS AND WORKSHOPS

For the updated list, view [my personal site](#)

Appropriate Use of AI | Speaker, University of Chicago, Aug 13, 2026

AI in Academic Work: Capabilities, Limitations, and Responsible Use | Invited Speaker, University of Chicago Law School, May 11, 2026

Working with AI at UChicago | Invited Speaker, UChicago Exploratory Teaching Group (ETG), May 4, 2026

AI in Academic Librarianship: What This Work Looks Like in Practice | Guest Lecture, University of South Carolina, Apr 16, 2026

What AI Can and Cannot Do | Workshop, Grad @ UChicago, Feb 17, 2026

Pulling the Wool Over AI | Guest Lecture, UChicago's HUMA 10001 Undergraduate Research: What, Why, and How, Feb 10, 2026

Using AI in Research and Writing | Workshop, UChicago Center for Digital Scholarship, Feb 5, 2026

Town Hall: Directions for AI | University of Chicago Library, Feb 4, 2026

Pulling the Wool Over AI | Workshop, UChicago Center for Digital Scholarship, Nov 18, 2025

Responsible AI Use in Humanities Research | Guest Lecture, UChicago's GNSE Thesis Seminar, Oct 24, 2025

GAITA: A Rag System for Personalized Computer Science Education | Research Talk, Apple, Sep 18, 2024

AWARDS AND HONORS

Rubenstein Fellowship – Johns Hopkins University, 2023

2nd Place – Intel® AI for Social Good Hackathon, NLP Track, 2022

Distinction in General Scholarship – UC Berkeley, 2021

Phi Beta Kappa – UC Berkeley, 2021

Berkeley Transfer Scholarship – UC Berkeley, 2020

Distinction – Associate of Trinity College London (ATCL) in Violin Performance Diploma, 2018
